## Job Growth: Industrial Manufacturing

---

According to Bloomberg, U.S. payroll gains rebounded in April 2017 by more than forecast and the jobless rate fell to 4.4%, signaling that the labor market remains healthy. Labor market conditions remain robust and continue to tighten,” said Ward McCarthy, chief financial economist at Jefferies LLC in New York, who had forecast a payrolls gain of 220,000. “This data will keep the Fed on track for a preferred 2017 normalization timeline of rate hikes in June and September and the first step toward balance-sheet normalization in December.”

What does this mean for you and your organization? As a recruiter, we have seen an influx of jobs over the past year and a half. It definitely seems to be a candidates market and qualified candidates have their pick of jobs. Our industrial clients are in need of strong Lean, Op Ex, Quality and Supply Chain professionals. In addition to management roles, plant level positions seem to be on the rise as well. Bloomberg reports that the underemployment rate, a measure that includes those working part-time who would take a full-time job if it were available, dropped to 8.6%, the lowest since November 2007, just before the last recession began. It was down from 8.9% in March. The number of discouraged workers fell by 5,000 in April to 460,000, and was 363,000 the month the last recession started.

Has your organization had a hard time finding and retaining talent?

## Meet the Team

Christine joined PinPoint Solutions in 2012 supporting B/E Aerospace. Christine was spearheaded to project lead for a new Engineering Center in Wichita, KS.

Christine works in multiple industries, however, she has a passion for the Industrial sector and has spent the past few years developing clients in this space. With the age of smarter products upon us, industrial manufacturers have an opportunity to tap into. The consumers needs are ever changing, and technology is now a key piece of keeping up with the latest trends. Christine loves being involved with organizations taking their products to the next level.

You can reach Christine at [Christine@pin-pointolutions.com](mailto:Christine@pin-pointolutions.com) or via phone, 864-385-6496 to discuss talent needs you may have.
