

Pin-Point Solutions: Plastics & Packaging Practice Area

Melissa Poole
Practice Director SME,
Lean/CI and Quality Operations

One Company's Trash is Another's Treasure: The Advantage of Circular Supply Chain

The packaging industry, particularly plastics, takes a lot of heat in the general consumer population for recyclability, landfills, global warming and other environmental concerns. I was recently reading an article in this month's edition of Packaging World that features PTM Images. PTM is a home furnishings and décor manufacturer in Mexico. They are now buying polystyrene and recycling it to be remolded into their products such as mirror and picture frames. Anne Marie Mohan further writes in her article that, "PTM shifted its supply chain from China to the U.S., where the company can utilize over 80% of U.S.-based raw materials".

What the article doesn't address, but I'd be interested in knowing is the cost savings to PTM? Essentially, their customers become their suppliers creating a circular supply chain which is diverting, according to the article, 50 truckloads of packaging materials from the landfills to PTM for conversion.

Announcements from PinPoint Solutions Packaging and Plastics Group

PinPoint Solutions announces the creation of the Packaging and Plastics Showcase Page on LinkedIn! Due to the sustained increase in this area, we are bringing our announcements to you via LinkedIn along with updates on searches. Please check out our page and follow us on LinkedIn by clicking the hyperlink (the next sentence).

Staff Spotlight: Melissa Poole

My passions are my practice areas, Lean/CI and Quality Operations. I know Quality and Lean/CI because I'm talking to these people day in and day out. I'm a member of these societies, I read journal articles around this area, thus it makes sense for me to stay in this lane.

Firstly, let me share a little about myself. I have 3 kids, 3 years old, 6 years old and 9 years old. I obtained my MBA while working full time at PinPoint Solutions and chasing a toddler and birthing my second child. I teach Children's Sunday School. I am the treasurer at our church and am on the church council. I coach basketball. My husband leads Cub Scouts. He works full time as Lead Machining Instructor at Danville Community College. His program was just featured on "Titan: American Built"! I have to LIVE lean!
